SUMMARY

Software Engineer with strong experience in software development, system design, and modern web applications. Skilled in building scalable solutions, designing relational databases, and developing responsive interfaces using Angular and TypeScript. Experienced in translating business requirements into technical solutions, integrating REST APIs, and applying software engineering practices such as object-oriented design, modular architecture, and version-controlled development workflows across frontend, backend, and database layers

WORK EXPERIENCE

Freelance Frontend Developer | Self-Employed | Remote

Dec 2023 – Present

- Delivered 3+ complete client websites using Angular 16–20, TypeScript, and SCSS — from requirements to production deployment.

Junior Web Developer | Bright Digital Agency | Damascus, Syria (Remote)

Jun 2023 – Nov 2023

- Built reusable Angular components with JWT-authenticated REST API integration across 4 client projects in 2-week Agile sprints.
- Refactored shared UI logic into standalone Angular modules, reducing duplicated code by ~30% across the codebase.

FEATURED PROJECTS

Golden Key Lock Repairing EST - Business Website – Angular 20, SCSS, Nginx | [Link](#)

2025

- 5-page production site for a Dubai locksmith: full SEO (JSON-LD Locksmith schema, geo meta, Arabic keywords), Nginx security hardening, Gzip compression, lazy loading, and Google Maps integration.
- Delivered Cloudflare/Netlify edge headers, and 4-platform social media integration - zero-cost, deployment-ready.

Souk Plus - E-Commerce Platform – Angular, Angular Material, REST API

2024

- Frontend for a full e-commerce platform: product dashboards, checkout flows, cart, and responsive layouts - plus ERD design and REST API integration.

School Management System + Union Exam Portal – TypeScript, Angular, OOP

2023

- CRUD system with multilingual UI, role-based logic, and strict TypeScript OOP. Exam portal contributed modular UI components and system analysis.
